

Red Light Source Calibration in Malaysia

Article Overview

Red light source calibration in Malaysia is available at accredited laboratories such as the Optical Calibration Laboratory under MYSA, Micro Precision Calibration, Alpha Instrumentation, Sendi Mahir, and G Calibration, all offering ISO/IEC 17025-compliant services.

Key Calibration Facilities

1. Optical Calibration Laboratory – Malaysian Space Agency (MYSA) Located in Malaysia, this lab specializes in electro-optical system calibration, including red light sources. It features a Class 10,000 cleanroom with controlled temperature (18 ± 2 °C), humidity ($50 \pm 5\%$), and dust levels, ensuring precise calibration conditions. The lab uses a 40-inch integrating sphere capable of producing uniform light from 400–2400 nm, suitable for red light source characterization and satellite imaging system calibration . 2. Micro Precision Calibration Micro Precision provides optical, light, and fiber optic calibration services across Malaysia, including Kuala Lumpur, Johor Bahru, Penang, and more. Their labs are ISO 9001:2015 verified and ISO/IEC 17025 accredited, offering high-accuracy calibration for red light sources, multimeters, oscilloscopes, and other optical instruments . 3. Alpha Instrumentation Sdn. Bhd. Based in Shah Alam, Selangor, Alpha Instrumentation offers precision calibration, repair, and certification services. They are accredited under Skim Akreditasi Makmal Malaysia (SAMM) and comply with MS ISO/IEC 17025, ensuring technical competence for red light source calibration and other optical measurements . 4. Sendi Mahir Sdn Bhd Sendi Mahir provides total calibration solutions in Southeast Asia, including red light source calibration. Their laboratory is SAMM-accredited and ISO/IEC 17025 certified, guaranteeing high standards of accuracy and precision for...
