

Relay Protection Tester Company

Article Overview

Key companies in the relay protection tester industry include OMICRON, Megger, Phoenix Contact, Schneider Electric, and DEMIKS, all offering advanced testing solutions for electrical power systems.

Leading Companies and Their Offerings

OMICRON (Austria) is globally recognized for its high-reliability relay testing equipment, including relay testers, primary test systems, and monitoring tools. Their products are known for comprehensive functionality and strong technical support, though they may require additional training due to product complexity . Megger (United Kingdom) is one of the oldest and most trusted electrical testing solution providers, offering a wide range of relay protection testers suitable for both conventional and digital relays . Phoenix Contact and Schneider Electric provide solutions that enhance power system resilience by protecting against voltage fluctuations, with a focus on industrial and utility applications . DEMIKS (Europe) specializes in relay protection testers, secondary injection testers, and advanced testing software, emphasizing high precision, user-friendly interfaces, and strong customer support . Other notable companies include WUHV and various manufacturers listed on platforms like DirectIndustry, offering products such as the HDJB-8000, RELAYSTAR-H60, and PW636i-F, which support multi-phase testing, IEC61850 digital relays, and microcomputer relay protection systems .
