

Senegal AI Server DML

Article Overview

Senegal is actively developing its AI ecosystem through national strategies, regional AI hubs, and applied machine learning platforms, including both public initiatives and private AI solutions.

National AI Strategy and Infrastructure

Senegal's National AI Strategy (SNIA), launched in 2023, aims to make AI a catalyst for socio-economic growth under the Plan Sénégal Émergent (PSE) and Sénégal Numérique 2025 frameworks, emphasizing ethical, trustworthy AI and technological sovereignty . Key objectives include improving living conditions, fostering regional leadership in West Africa, and ensuring responsible AI governance. The strategy plans the creation of a national AI research and training institute, a Cluster Sénégal IA, and a data lake aggregating public and private sector data to support AI development . These initiatives provide the backbone for AI servers, data management, and machine learning deployment in Senegal.

AI Hubs and Regional Leadership

Senegal has positioned Dakar as a central tech hub, hosting AI startups and research collaborations. The launch of Afrik'IA in 2024 at the Agence Universitaire de la Francophonie (AUF) provides generative AI services for businesses and institutions, optimizing operations in sectors like education, agriculture, and health . This hub supports AI server infrastructure and applied machine learning (DML) services, enabling local deployment of AI models and automation tools....
