

Several Types and Models of Household Distribution Boxes

Article Overview

Household distribution boxes, also known as consumer units or electrical panels, come in various models including surface-mounted, flush-mounted, single-phase, and multi-phase boxes, each designed to safely distribute electricity to different circuits in a home.

Overview

A distribution box is the central hub of a home's electrical system, taking power from the main supply and dividing it into multiple circuits for lighting, outlets, appliances, and specialized equipment like air conditioners or EV chargers . It houses protective devices such as circuit breakers, fuses, RCBOs, and surge protection devices to prevent overloads, short circuits, and electrical hazards .

Common Models

- Surface-Mounted Distribution Boxes
 - Installed directly on walls, ideal for retrofits or industrial-style homes.
 - Easy to access for maintenance and upgrades .
- Flush-Mounted Distribution Boxes
 - Embedded into walls for a clean, aesthetic appearance.
 - Common in modern residential buildings where design integration is important .
- Single-Phase Distribution Boxes...
