

Single-port IPKVM Switcher

Article Overview

Single-port IP KVM switchers allow remote BIOS-level access, control, and power management of a single server or workstation over LAN, WAN, or the Internet.

Overview

Single-port IP KVM (Keyboard, Video, Mouse) switchers are designed to provide remote access and management for a single server or workstation, enabling IT administrators to troubleshoot, configure, and maintain systems without being physically present. These devices are ideal for data centers, branch offices, or remote locations where direct access is limited.

Key Features

1. Remote Access and Control

- Provides BIOS-level access to servers, PCs, or workstations over IP using standard web browsers, Windows clients, or Java-free HTML5 interfaces (Raritan KX IV-101, ATEN KN1000A, Vertiv Avocent) .
 - Supports simultaneous remote sessions in some models, allowing multiple administrators to access the system concurrently .
- #### 2. Video and Display Support
- High-resolution support varies by model:
 - Raritan KX IV-101: Ultra HD 4K (3840x2160) at 30 fps, HD up to 1920x1200 at 60 fps .
 - ATEN KN1000A: Up to 1920x1200
