

Standard Drawing of Cable Tray

Article Overview

Cable tray construction drawings and CAD blocks are available for ladder, perforated, solid-bottom, and wire mesh trays, following NEC, NEMA, and ASTM standards.

Overview of Cable Tray Systems

Cable tray systems include straight sections, bends, tees, elbows, drop-outs, supports, and accessories. Common types are ladder, trough, solid-bottom, and channel trays. These systems are designed to support and route electrical and data cables safely while allowing for ventilation, maintenance, and future expansion .

Standards and Compliance

Construction and installation of cable trays must comply with:

- NEC (National Electrical Code) Article 392 for cable tray systems .
- NEMA VE 1 and VE 2 for metallic cable tray systems and installation guidelines .
- ASTM standards for steel and zinc coatings (A123, A653, A1011, A1008, B633) to ensure structural integrity and corrosion resistance .
- UL and NFPA 70B for product classification and electrical equipment maintenance .

Construction Drawings and CAD Resources

- Eaton Specification Document: Provides detailed submittal drawings, product data, and installation guidelines including rung spacing, inside depths, fitting radii, and cross-sectional properties like Section Modulus and Moment of Inertia
