

Swedish double-sheathed ADSS overhead optical cable manufacturer

Article Overview

While there is no widely documented Swedish manufacturer of double-sheathed ADSS cables, several international suppliers provide high-quality double-sheathed ADSS cables suitable for use in Sweden.

Key International Suppliers

- OMC Cable: Offers state-of-the-art double-sheathed ADSS fiber optic cables designed for harsh environmental conditions. Their cables provide high-speed data transmission, low attenuation, and robust protection against mechanical and environmental stresses, making them suitable for long-distance overhead installations .
- AFL: Manufactures AFL-ADSS® (All-Dielectric Self-Supporting) cables, including double-sheathed variants. These non-metallic cables support their own weight without messenger wires, are suitable for live-line installations, and use aramid yarns for strength and durability .
- Prysmian Group: Offers ADSS cables for spans up to 800 meters, including double-sheathed designs. Prysmian has a strong presence in Europe, including Sweden, and provides solutions for both distribution and transmission networks .
- OPTRAL: Provides aerial dielectric cables with a double jacket for various span distances. Their double-sheathed ADSS cables are designed for overhead installation and offer enhanced protection and longevity .
