

Switch equipped with 10G optical module

Article Overview

Yes, the switch supports 10G optical modules via SFP+ ports, enabling high-speed fiber connectivity.

Overview of 10G SFP+ Support

A 10G SFP+ switch is equipped with SFP+ ports that can handle data rates up to 10 Gbps. These ports allow the use of hot-pluggable 10G optical modules, which convert electrical signals to optical signals for high-speed fiber transmission, making them ideal for data centers, enterprise networks, and high-performance server connections (FASTCABLING) .

Types of 10G Optical Modules

The switch can accommodate various 10G SFP+ modules depending on your network requirements:

- Short-Range (SR): Uses multimode fiber at 850nm, suitable for distances up to 300m on OM3 fiber or 400m on OM4 fiber, ideal for intra-data center links (L-P.com) .
- Long-Range (LR): Uses single-mode fiber at 1310nm, supporting distances up to 10 km, suitable for campus or inter-building connections (Getek) .
- Extended Range (ER): Uses single-mode fiber at 1550nm, designed for very long distances up to 40 km (FASTCABLING) .
- Bi-Directional (BiDi): Uses different wavelengths for transmit and receive over a single fiber strand, supporting up to 10 km (FASTCABLING)
