

TP-Link 8-Port Gigabit Ethernet Switch with Optical Ports

Article Overview

TP-Link 8-Port Gigabit Switches like the TL-SG1008 provide high-speed Ethernet connectivity, energy-efficient operation, and easy plug-and-play installation, but standard models do not include an optical port.

Key Features of TL-SG1008

The TL-SG1008 is an unmanaged 8-Port Gigabit switch designed for desktop or rackmount use. All 8 ports support Auto-MDI/MDIX, eliminating the need for crossover cables, and automatically detect connection speeds of 10/100/1000 Mbps for optimal performance. It features energy-efficient technology, reducing power consumption by up to 70% by adjusting power based on link status and cable length. The switch has a non-blocking architecture with a 16 Gbps switching capacity and an 8k MAC address table, ensuring smooth data transfer and scalability. It supports 802.3X flow control for full-duplex and backpressure for half-duplex modes, enhancing network reliability. Installation is plug-and-play, requiring no configuration, and dynamic LEDs provide real-time status and basic diagnostics .

PoE Variants

For users needing Power over Ethernet (PoE), the TL-SG1008P or LS108GP models provide 4-8 PoE+ ports compliant with 802.3af/at standards, delivering up to 30 W per port and a total PoE budget of 60-62 W. These switches are ideal for powering IP cameras, access points, and IP phones while maintaining high-speed Gigabit connec...
