

The soundtrack of the fiber optic cable being cut

Article Overview

While there is no literal recording of a fiber optic cable being cut, the concept has inspired both experimental music and viral audio-visual trends.

Artistic Interpretation

The Fiber Optic Symphonic Orchestra (FOSO) created an immersive audiovisual installation where fiber optic cables are paired with a symphonic soundtrack. In this installation, cylindrical arrays of fiber optic cables change colors in sync with music, translating sound into visual patterns. The album 'Tessellation' serves as the original soundtrack, combining organic and electronic orchestral sounds to evoke the sensation of interacting with fiber optic structures, creating an emotional and dynamic experience akin to “hearing” the cables in motion .

Viral Meme and Audio Trend

On social media, particularly TikTok, the “Fiber Optic Cable Core” trend emerged, where creators isolate and repeat words or sounds from videos, often including the phrase “fiber optic cable.” These edits use ethereal, distorted audio and visual effects to create a surreal, almost musical experience. While not a literal recording of a cable being cut, the trend has become associated with a distinctive, hypnotic sound aesthetic that evokes the idea of fiber optic activity .
