

Tonga lays fiber optic cable

Overview

Tonga Cable System is a submarine fiber-optic cable system connecting Tonga with Fiji, where it connects to other international networks. It is 827 kilometres (514 mi) long and was activated in 2013. It has cable landing points at Sopo, a suburb of Nuku'alofa in Tonga, and Suva, Fiji. The internet is kind of like drinking water, says UC Berkeley Professor Nicole. Before August 2013, Tonga had no submarine cable. A nation of 100,000 people spread across 170 islands in the South Pacific depended entirely on Intelsat satellite links for all international communications. A basic broadband. Repairs to Tonga's Domestic Cable system connecting Tongatapu to Ha'apai and Vava'u have finally been completed, 18 months on from the Hunga-Tonga Hunga-Ha'apai volcanic eruption that caused damage to the system. The residents of Vava'u and Ha'apai will continue experiencing phone and internet outages caused by the damaged submarine.
