

Types of plugs in a three-level distribution box

Overview

The most common plug types are CEE yellow 2P+E, CEE blue 2P+E, CEE yellow 3P+E, CEE blue 3P+E and CEE red 3P+N+E. The colour of the casing refers to the regional electric power distribution at either 110/120 Volt = yellow, 230/240 Volt = blue or 400 Volt = red. Industrial and multiphase plugs and sockets provide a connection to the electrical mains rated at higher voltages and currents than household plugs and sockets. Industrial. IEC 60309 (formerly IEC 309) is an international standard from the International Electrotechnical Commission for "plugs, socket-outlets and couplers for industrial purposes". The highest voltage allowed by the standard is 690 V DC or AC; the highest current, 250 A; and the highest frequency, 500. That's where industrial plugs, sockets, and connectors from MX step in—engineered for robustness, performance, and versatility. Whether you're wiring factory floors, event setups, or outdoor installations, MX provides the expertise and solutions you need.
