

UAE Anti-corrosion Stainless Steel Cable Tray Specifications

Article Overview

Stainless steel cable trays in the UAE are designed for high corrosion resistance, durability, and compliance with international standards such as NEMA, IEC 61537, and BS EN 61537.

Material and Corrosion Resistance

UAE cable trays are commonly manufactured from stainless steel grades AISI 304 and 316, which provide excellent resistance to moisture, salt mist, and chemically aggressive environments, making them suitable for marine, offshore, and industrial applications. Other corrosion-resistant options include hot-dip galvanized steel, aluminum, and FRP/GFRP composites, with additional protective coatings like powder coating, epoxy-polyurethane, or marine-grade paints for enhanced durability. Stainless steel trays are preferred in environments with high humidity, chemical exposure, or saltwater contact.

Types and Configurations

Cable trays are available in multiple types to suit different load and ventilation requirements:

- Ladder trays: Ideal for heavy-duty cable runs and trunk lines, providing maximum ventilation and load-bearing capacity.
- Perforated trays: Suitable for light to medium loads, offering airflow and secure ca...
