

Various electrical distribution boxes

Article Overview

Electrical distribution boxes come in various types, each designed for specific applications and environments, including Main Distribution Boards, Sub Distribution Boards, and Smart Distribution Boxes.

Common Types of Electrical Distribution Boxes

- Main Distribution Board (MDB):
 - This is the primary distribution point where electrical power from the main supply is distributed to various sub-distribution boards or final circuits. It typically houses the main switch, circuit breakers, and busbars for distributing power throughout a building .
- Sub Distribution Board (SDB):
 - These boards receive power from the main distribution board and further distribute it to specific areas or floors within a building. They help organize and control power distribution in a more localized manner .
- Consumer Unit:
 - Commonly found in residential settings, consumer units contain circuit breakers or fuses for various household circuits, providing a point of control and protection for i...
