

Warranty on network security equipment

1G

Article Overview

1G network security equipment from major vendors is typically covered under a standard 1-5 year warranty, depending on the manufacturer and product registration.

Vendor Warranty Overview

Cisco: Cisco warranties apply to the original end-user and are non-transferable. Coverage depends on the product family and can be verified using Cisco's Warranty Finder tool. Certain warranties include enhanced advance replacement options, but warranty terms may vary by product and version . Netgear: NETGEAR provides separate warranties for enterprise and home networking products. Registration of the product is required to activate warranty coverage, which typically includes repair or replacement of defective hardware . Juniper Networks: Standard Juniper hardware is warranted for one year from the shipment date against defects in materials and workmanship. The warranty covers repair or replacement at Juniper's discretion. Software media is warranted for 90 days. Warranty coverage is limited to the original purchaser and excludes misuse, unauthorized modifications, or use in critical systems like nuclear or life-support equipment . Extreme Networks: Extreme Networks provides warranty coverage for its networking solutions, including security devices, with detailed policies available on their support site. Coverage generally includes repair or replacement of defective hardware . Cambium Networks: Cambium offers a one-year standard warranty for hardware products, covering defects in materials and workmanship. Extended warranties can be purchased to increase coverage up to five...
