

Waterproofing Treatment of Cold Storage Electrical Distribution Box

Article Overview

Use IP65 or higher-rated enclosures with proper sealing, insulation, and condensation management to protect electrical distribution boxes in cold storage environments.

Selection of Enclosure

Choose a waterproof distribution box rated IP65 or higher to ensure protection against dust, water jets, and condensation. Plastic enclosures made of ABS or polycarbonate are lightweight, impact-resistant, and UV-stabilized, while metal enclosures with proper coatings can also be used for durability . For cold storage, ensure the enclosure can withstand low temperatures, typically down to -25°C , without cracking or losing sealing integrity .

Sealing and Waterproofing Techniques

- Sealing strips: Use EPDM foam strips or similar materials around doors and joints to prevent moisture ingress. These strips compensate for minor surface irregularities and maintain a tight seal .
- Cable entry points: Seal all cable knockouts with grommets or silicone sealant to prevent water or frost from entering through wiring openings .
- Weatherproof covers: Install an additional cover or flap over the enclosure to divert water and ice away from the seals .
- Flanged door edges and drainage channels: Design or select enclosures with flanged edges and channels to guide water away from critical areas, reducing press...
