

What are the finished accessories for cable tray elbows

Article Overview

Finished accessories for cable tray elbows include covers, end caps, dividers, couplers, and grounding components, typically made from galvanized steel, stainless steel, aluminum, or epoxy-coated materials.

Overview of Cable Tray Elbow Accessories

Cable tray elbows are used to change the direction of cable runs, either horizontally or vertically. To ensure proper installation, safety, and cable protection, several finished accessories are used in conjunction with elbows:

- **Covers and Cover Clamps:** Protect cables from dust, debris, and mechanical damage while maintaining electromagnetic interference (EMI) shielding. Clamps secure the covers to the elbow section for stability .
- **End Caps / End Plates:** Close open ends of elbows to prevent cable abrasion and provide a clean termination .
- **Dividers / Barriers:** Separate different types of cables (e.g., power and communication) within the elbow to prevent interference and maintain organization .
- **Couplers / Connectors:** Straight or adjustable couplers connect elbow sections to straight tray runs, ensuring alignment and structural integrity .
- **Grounding Straps / Bonding Jumpers:** Maintain electrical continuity across the elbow and the rest of the tray system, ensuring safety and compliance with grounding standards .
- **Supporting Brackets and Suspension Rods:** Provide mechanical support for elbows...
