

What category does a secondary distribution box belong to

Overview

A secondary distribution box, also known as a sub-distribution panel, generally supplies power to a specific area. It is designed with inner and outer doors, features a sprayed plastic exterior for safety and appearance, and also has a rainproof top suitable for outdoor work. Today, we will clarify their precise meanings and functions. Many feeders leave substation in a concrete ducts and are routed to a nearby pole. Feeders. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. The SDB can be fitted with terminal blocks for custom.
