

What checks should be done before installing cable trays

Overview

Review safety protocols and ensure PPE is available for all workers. Ensure that grounding and bonding materials are included. But before you lay the first tray or clamp down a single cable, you need a solid plan. This guide breaks down the process step by step. Mark the cable tray route based on your electrical cable tray design and site. Building Strength: If you are putting in heavy cable trays or many cables, check that the building's structure (like floors or walls) can hold the weight. Rules and Permits for Cable Trays: Local Building Rules: Always follow the local building. This procedure includes pre-installation preparation, material verification, layout inspection, and final testing, ensuring reliable and efficient cable tray installations. Double-check measurements to avoid misalignment. The. This method statement covers the site installation of the cable tray & ladders and the requirements of checks to be carried out.
