

What is a ZN distribution box

Article Overview

The ZN distribution box, specifically the ZN151 Abrites Distribution Box, is a specialized automotive diagnostic tool used to connect to vehicle electronic control modules (ECUs) for reading, writing, and programming functions.

Overview

The ZN151 Distribution Box is designed to work in conjunction with the AVDI interface and Abrites diagnostic software. It is not a standalone device but serves as an intermediary that allows the software to communicate with various vehicle modules. It supports both bench work (off-vehicle) and in-vehicle connections, making it versatile for different diagnostic and programming scenarios .

Key Functions

- **ECU Reading and Writing:** Enables reading and writing of ECU data, including flashing and updating modules.
- **Module Programming:** Supports functions such as neutralizing, virginizing, personalizing, and activating modules.
- **Key Programming:** Facilitates key learning and programming for vehicles like Mercedes-Benz trucks and Setra buses.
- **Password Extraction:** Includes a fuse relay for fast password extraction from certain Mercedes-Benz modules .

Supported Protocols and Connections...
