

What is the HS code for an optical power meter

Article Overview

The primary HS Code for an optical power meter is 902750, under instruments for physical or chemical analysis.

Detailed Classification

HS Code 902750 falls under Chapter 90, which covers optical, photographic, cinematographic, measuring, checking, precision, medical, or surgical instruments and apparatus. Specifically, heading 9027 includes instruments and apparatus for physical or chemical analysis, and subheading 50 designates instruments for measuring optical power and related photometric parameters. Optical power meters are electronic instruments used to measure the power output of optical signals, commonly in fiber optic communication systems, and are essential for calibration, testing, and maintenance of optical networks.

Alternative Codes and Regional Variations

- Some trade databases list HS Code 90303390 for optical power meters, particularly in import/export records, reflecting regional or national classification practices.
- General references to power meters sometimes use HS Code 902830, which broadly covers electrical measuring instruments, but this is more applicable to electrical rather than optical power meters.
