

What is the unit price of aerial optical cable

Article Overview

Aerial optical fiber cable typically costs between \$0.10 per foot for bulk small-core orders and \$12 per linear foot for installed, high-capacity outdoor runs.

Cost Overview

- Per Foot / Per Mile: Aerial installation generally ranges from \$8 to \$12 per linear foot, translating to approximately \$40,000 to \$60,000 per mile, which includes the cable, suspension hardware, and labor .
- Bulk Cable Pricing: Standard single-mode G652.D cables cost \$2,900 per mile for orders over 10 miles and up to \$4,200 per mile for single-mile purchases. Higher core counts, such as 144-core cables, can cost 60% more than 48-core equivalents .
- Small-Core Bulk Orders: For smaller quantities, such as 24-core ADSS cables, prices can range from \$0.10 to \$151 per unit, depending on length and supplier .

Factors Affecting Price

- Cable Type: Self-supporting (ADSS) cables include integral strength members, while catenary designs attach to external steel messengers. Figure-8 and lashed cables differ in construction and installation requirements .
- Core Count: More fiber strands increase cost; 24-48 cores are common for smaller networks, while 144 or more cores are used for high-capacity backbones .
- Installation Complexity: Costs rise with longer spans, urban density, or challenging terrain. Labor, permits, and hardware can significantly affect total project cost
