

What size is a 16mm distribution box

Article Overview

A 16mm distribution box typically refers to a 16-way plastic or metal enclosure, with dimensions around 300–400 mm in height, 200–300 mm in width, and 80–120 mm in depth, depending on the manufacturer and mounting type.

Physical Dimensions

A standard 16-way distribution box is designed to accommodate 16 circuit breakers or modular devices. For example, plastic built-in 16-way boxes often have dimensions approximately 350 mm height × 250 mm width × 90 mm depth for flush mounting, though exact sizes vary by brand (). Metal or outdoor-rated boxes may be slightly larger to allow for cable entry, bus bars, and ventilation ().

Material and Mounting

- Plastic boxes are commonly used for indoor installations and are suitable for flush or surface mounting ().
- Metal boxes are preferred for outdoor or industrial applications, offering higher durability and protection against environmental factors ().
- Boxes are typically rated IP30–IP55, depending on whether they are indoor or outdoor units ().

Capacity and Usage

- A 16mm or 16-way box can house 16 single-pole breakers or a combination of multi-pole breakers....
