

Where is the best place to plug in the broadband fiber optic cable

Article Overview

The broadband fiber optic cable is plugged into an Optical Network Terminal (ONT), which converts the fiber signal into an electrical signal for your router and devices.

Connection Overview

The fiber optic cable from your Internet Service Provider (ISP) enters your home either overhead from a pole or underground through a conduit and is first connected to a wall outlet or a small box near your entry point. From there, the cable is plugged into the Optical Network Terminal (ONT), usually located in a convenient spot such as a garage, basement, or office .

Role of the ONT

The ONT is the main interface between the fiber network and your home network. It converts the incoming light signal from the fiber into an electrical signal that your router can use . The ONT requires a constant power supply, so it is plugged into a standard electrical outlet, and some setups may include a backup battery for temporary power during outages .

Connecting to Your Router

Once the fiber signal is converted by the ONT, an Ethernet cable is used to connect the ONT to your router's WAN port. This allows the router to distribute the internet s...
