

Why is only the fiber optic light on the router lit

Overview

The internet light, also sometimes labeled WAN or PON (fiber only) or with a globe icon, signifies a connection to the internet. This light shows whether your ONT is getting power. What to check: Make sure the power cable is securely plugged into both the ONT and a working wall outlet. Typically, these lights correspond to various router functions such as power. Once connected, the status light on the front of the modem will be solid green. Make sure you. The LEDs on your modem, optical network terminal (ONT), router, or modem/router combo (gateway) are most likely blinking because they're communicating what the device is doing, or there's an error. POWER Normal: Solid/stagnant light. If OFF: The router is not powered — check the socket, adapter, or power cable.
