

Why use tubular wires for busbars

Overview

Tubular busbars are hollow, lighter in weight, and help improve cooling in high-current systems. Whether you are looking for a busbar in panel for an industrial switchgear or a specialized battery busbar for a new energy vehicle. A conductor or group of conductor used to collect the power from incoming feeders and distribute to the outgoing feeders is known as busbar. it collects the power at single point. Proper size. Hydro manufactures extruded aluminium busbars, tubular conductors, and flat wire profiles for OEMs and panel builders. Aluminium offers strong electrical conductivity at roughly half the weight of copper, with built-in corrosion resistance and full recyclability.
