

Zambian optical cable winding tube 1000mm depth specifications and models

Article Overview

Optical cable winding tubes in Zambia with 1000mm depth are typically designed for single-mode or multi-mode fiber storage, featuring robust metal or polymer construction, anti-bend protection, and compatibility with standard fiber counts.

Typical Specifications

- **Depth and Dimensions:** Standard winding tubes for fiber optic storage in Zambia are available with a 1000mm depth, suitable for accommodating excess fiber lengths and splices during installation .
- **Material:** Tubes are commonly made from corrosion-resistant metal or high-strength polymer, ensuring durability in outdoor and indoor environments .
- **Fiber Capacity:** Depending on the model, winding tubes can store up to 1200 meters of fiber, supporting single-mode or multi-mode fibers, including G.652.D, G.655, G.657.A1, and OM1-OM4 types .
- **Protection Features:** Equipped with bend radius control, anti-compression design, and sometimes LSZH or PE coatings to prevent flame spread and environmental damage .
- **Mounting Options:** Can be wall-mounted, pole-mounted, or installed in handholes, with sliding or pivoting drawers for easy access to patch panels and splice trays .
- **Temperature Range:** Designed to operate in a wide range of temperatures, typically -20°C to +70°C, suitable for Zambian climate conditions .
- **Standards Compliance:** Most winding tubes comply with TS EN 60794 standards for optical fiber cables
